Ultralox® manufactures premium powder-coated aluminum railing and fencing systems for decks, patios and swimming pools with low-maintenance living in mind. Our dedication to research and development ensures a uniquely engineered railing system that meets commercial and residential codes throughout North America.

IMPORTANT NOTES:

- Actual panel lengths = 69.43in and 91.31in; 3in posts are required to reach 6ft and 8ft lengths.
- Panel attach kits are included with panel kits. If panels are cut down and used as two pieces, additional panel attach kits may be purchased separately.
- Fence Panels are slightly adjustable and will accommodate sloped ground surfaces up to an 8° angle, but this will reduce the distance allowed between posts. CAUTION: Over adjusting panels will cause loose and rattling pickets.
- 45° fence angles require 22.5° clips applied to each side of the post. The 22.5° clip kit is sold SEPARATELY.
- It is the responsibility of the installer to meet all local code requirements and obtain all required building permits.

1/2in x 3/4in

Light weight pickets for decorative residential applications.

3/4in x 3/4in

Heavy duty pickets for commercial applications such as security fencing.
